## Company Overview

Krios Industrial Solutions is a Service-Disabled Veteran-Owned Small Business (SDVOSB) specializing in structural repairs, welding services, and hull/foundation modifications for U.S. Navy vessels. Founded in 2025, Krios Industrial Solutions provides shipyard-ready support backed by decades of relevant hands-on experience from its leadership and key personnel.

## RELEVANT TEAM EXPERIENCE

The experience described below reflects the prior individual experience of Krios Industrial Solutions' key personnel before company formation

- Experience across major U.S. shipbuilding and repair facilities, including Newport News (HII); Portsmouth (BAE, NASSCO); San Diego (NASSCO); Puget Sound (NASSCO); and Alabama (Austal)
- Decades of experience performing structural repairs, insert work, foundation installations, and hull modifications on CVN, LHA, LPD, T-AO, DDG, LCS, and JHSV platforms
- Proven ability to execute work under compressed availabilities while meeting NAVSEA requirements and all shipyard safety, QA, and control processes.

## DIFFERENTIATORS

- Safety Culture – Proven commitment to NAVSEA, OSHA, QA, and procedural compliance
- Deep Experience – Skilled workforce with decades of Navy ship repair and construction
- Lean Overhead in Pricing – Competitive bidding to build work history
- Veteran-Owned – Founder team of Naval officer with construction management experience and senior shipfitter/welder with 20 years of Navy ship repair experience
- SDVOSB Advantage – Set-aside credit for primes on MACs, MSRC contracts, and IDIQs

## CORE COMPETENCIES

### Shipfitting, Shipwright & Structural Work

- Structural fabrication and installation in steel, aluminum, and stainless steel
- Structural welding (per NAVSEA and shipyard-qualified procedures)
- Bulkhead, deck, and foundation replacement
- Inserts, renewals, and structural modifications
- Removal, repair, and installation of watertight doors, hatches, ladders, and foundations
- Hull and structural alignment support
- Precision layout, measurement, and marking for structural installation and modifications

### Supplementary Trades

- Pipe: Basic pipe removal, fitting, and installation support
- HVAC: Light ducting, ventilation, and equipment support
- Electrical: Removal/reinstallation, cable pulling, and component support

Supplementary trades are provided only in support of primary steel and structural scopes and are not proposed as standalone self-performed work.

### NAICS Codes
